without nidagravel®

With the enormous choice in types of gravel available and gravel's natural colours, a suitable type of gravel can be found for more or less every conceivable application. Gravel has a calming effect, makes areas seem larger and combines harmoniously with the rest of our outdoor space. Gravel is also ideal for use in gardens and parks and for driveways.

with nidagravel®

Gravel used in combination with nidagravel® 140 is much easier to walk, ride and drive across than loose gravel. You no longer sink into it. With nidagravel® 140 walking, cycling, using a wheelchair or pushing a pushchair across gravel is no longer a problem. The gravel is held in place in the honeycombs so that it can no longer migrate. From now on unattractive rutting, puddles and holes are a thing of the past.

Application areas

Providing driveways, car parks, terraces, paths and public areas as parks. nidagravel 140 is resistant to access by emergency/utility vehicles.

Technical specifications

Tray size: Length x Width x Height: 2400 mm x 1200 mm x 40 mm

Compressive strength (filled): up to 250 tonnes/m² *

Colour: milky white

Weight empty: 1,8 kg/m² ; Weight filled: 80 kg/m² (60 L/m²)

nidagravel® 140 trays are made from extruded polypropylene and consist of hexagonal honeycombs 39 mm in diameter. The trays are backed with a permeable anti-rooting membrane. nidagravel® 140 is suitable for gravel with a maximum size of 16 mm.

Benefits

- a durable and **stable gravel finish** without rutting.
- easy to walk across**, ride across on a bicycle or in a wheelchair or drive across in a car.
- 100 % free-draining surfaces**; to reduce the impact on the environment.
- the light and flexible nidagravel® trays do not move, **not even on a slope***, and follow the contours of your land perfectly.
- the thermally bonded geotextile** prevents the gravel from sinking and eventually pushing up the tray.
- nidagravel® is **weed resistant** and easy to maintain.
- nidagravel® is **invisible** once laid.
- low weight in combination with large size makes **fast installation** possible.
- easy to lay** with no special tools required.
- nidagravel® is **recyclable** and resistant to UV rays and frost.
